

Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)
MONITORING, ROUTINE (DBP), MAJOR/CHLORINE

The CITY OF PAMPA water system PWS ID 0900003 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis. Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring period of April 1 to June 30, 2013.

We have taken the following actions to address this issue:

We failed to submit the second quarter Disinfectant Level Quarterly Operating Report (DLQOR) to the TCEQ as required by July 10, 2013. All second quarter disinfectant residual monitoring had been completed, the report prepared but the mailing deadline was missed. The results of all monitoring conducted during this period met regulatory limits set for chlorine residual and all bacteriological samples taken during this quarter were negative. We submitted the DLQOR to the TCEQ on 11/20/13. To prevent recurrence, we have added this task to our maintenance software program. A reminder will now be generated at the first of every quarter.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distribution copies by hand or mail.

If you have any questions regarding this matter, you may contact Gary Turley, Project Manager, CH2M HILL at (806)669-5830.

Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)
MONITORING, ROUTINE (DBP), MAJOR/CHLORINE

The CITY OF PAMPA water system PWS ID 0900041, TDCJ Baten & Jordan Units, has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.
